***n* = 2,567; September 8—October 23, 2016; Median Time = 23 min**

My name is Hank C. Jenkins-Smith, and I am a professor at the Center for Risk and Crisis Management at the University of Oklahoma. I am requesting that you volunteer to participate in a research study titled “Oklahoma Weather, Society and Government Survey.”

**Purpose of the Research Study**

The purpose of this study is to measure perceptions of weather in Oklahoma and views on government policies and societal issues, and to understand how those perceptions and views might shape Oklahomans’ uses of water and energy.

**Number of Participants**

Up to 7,000 people will take part in this study.

**Procedures and Length of Participation**

If you agree to participate in this study, you will be asked to respond to an Internet survey that should take an average of about 30 minutes to complete. You will be invited to respond to a similar Internet survey each quarter (four times per year) until May 2018.

**Risks of being in the study**

There are no risks associated with participation in this study.

**Benefits of being in the study**

There are no benefits associated with participation in this study.

**Compensation**

Should you complete the survey, you will receive a \$10 gift card.

**Confidentiality**

The records of this study will be kept private. In published reports, there will be no information included that will make it possible to identify you as a research participant. Research records will be stored securely. The data will not include any information that would make it possible to identify you. Only approved researchers will have access to the records. There are organizations that may inspect and/or copy your research records for quality assurance and data analysis. These organizations include the OU Institutional Review Board.

**Voluntary Nature of the Study**

The study will ask questions about your observations on current issues, including your views on extreme

weather and climatological issues such as severe thunderstorms, wind events, floods, droughts, and long-term weather patterns. In the unlikely event that any of these questions make you uncomfortable, in most cases you may skip that question and continue with the survey. In a few cases, we require responses to certain questions so that we know what to ask you in a follow-up question. You may also quit the survey at any time, should you desire to do so.

**Contacts and Questions**

If you have concerns or complaints about the research, I am the primary investigator conducting this study, and I can be contacted at the Center for Risk and Crisis Management at the University of Oklahoma, at (405) 325-1720 or at [crcm@ou.edu](mailto:crcm@ou.edu). In the event of a research-related injury, contact the researcher(s). You are encouraged to contact the researcher(s) if you have any questions. If you have any questions, concerns, or complaints about the research and wish to talk to someone other than the individuals on the research team, or if you cannot reach the research team, you may contact the University of Oklahoma – Norman Campus Institutional Review Board (OU-NC IRB) at (405) 325-8110 or [irb@ou.edu](mailto:irb@ou.edu).

**consent:** Do you agree to participate in this study?  
[DROPDOWN LIST]

- 0 - No, I do not want to participate in this study
- 1 - Yes, I agree to participate in this study

*Please print this information sheet for your records. By providing information to the researcher, I am agreeing to participate in this research.*

**This research has been approved by the University of Oklahoma, Norman Campus IRB.**

**IRB Number: 3938**

**Approval date: 08/30/2016**

This survey involves policy choices about complex

issues. Lengthy interruptions in the survey will make it difficult to respond to some of the questions. As previously noted, the survey should take only about 30 minutes to complete, but we ask that you avoid long interruptions if possible.

Please review the following demographic information that you previously provided to our research team. If the information is the same, there is no need for any action. However, if as of today our records are incomplete or incorrect, please provide us with the correct information by using the boxes provided below. Thank you!

The next few questions ask you to compare weather patterns *this summer* (June, July and August 2016) to weather patterns in *previous summers*.

**ssn\_precip:** In the area around where you live (by this we mean within about ten miles of your residence), would you say that the amount of precipitation that fell *this summer* was more, less, or about the same amount as in *previous summers*?

- 3 - More
- 2 - About the same
- 1 - Less

**ssn\_tmp:** In the area around where you live, would you say that *this summer* has been warmer, cooler, or about the same as *previous summers*?

- 3 - Warmer
- 2 - About the same
- 1 - Cooler

-----End Web pg -----

Now we want you to compare weather patterns over the *past three years* to weather patterns in *previous years*.

**drghtfreq:** In the area around where you live, has drought occurred more frequently, less frequently, or with about the same frequency in the *last three years* as drought in *previous years*?

- 3 - More frequently
- 2 - With about the same frequency
- 1 - Less frequently

**drghtsev:** In the area around where you live, has drought been more severe, less severe, or about as severe in the *last three years* as drought in *previous years*?

- 3 - More severe
- 2 - About as severe
- 1 - Less severe

**fldfreq:** In the area around where you live, has flooding occurred more frequently, less frequently, or with about the same frequency in the *last three years* as flooding in *previous years*?

- 3 - More frequently
- 2 - With about the same frequency

- 1 - Less frequently

**fldsev:** In the area around where you live, has flooding been more severe, less severe, or about as severe in the *last three years* as flooding in *previous years*?

Now, we have a few questions about wildfires in Oklahoma. By wildfire, we mean an out of control and inadvertent fire that starts outdoors in grass, trees, or other combustible vegetation. Wildfires are different from other outdoor fires, such as prescribed burns, that are intentionally set under controlled conditions. They are also different than indoor fires that start within a structure, rather than outdoors.

**fire\_risk:** On a scale from zero to ten, where zero means *no risk* and ten means *extreme risk*, how much

risk do you think wildfires pose to people and structures on your property?

- 0 – No risk
- 1
- 2
- 3
- 4
- 5
- 6
- 7
- 8
- 9
- 10 – Extreme risk

**fire\_risk\_20yrs:** Over the last 20 years, would you say that the risk of wildfire to people and structures on your property has increased, stayed about the same, or decreased?

- 3 - Increased
- 2 – Stayed about the same
- 1 - Decreased

**fire\_cause:** To the best of your knowledge, what causes most of the wildfires that we experience in Oklahoma?

- 1 - Arson
- 2 - Lightning or other natural causes
- 3 - Industrial accidents
- 4 - Prescribed burns that escape and spread
- 5 - Accidents starting from BBQs, campfires, cigarettes, car mufflers, etc.

In Oklahoma, the risk of wildfire to a house or structure is partially dependent on the landscape that surrounds that house or structure. To measure your thoughts about wildfire risk, we would like you to compare several pairs of landscapes to one another. In some cases, we may present the same landscape, but a different comparison.

[NOTE: LARGER FONT] First, we will ask you to compare two landscapes and indicate which landscape is *more* susceptible to wildfire. There will be *four pairs* of these landscapes.

[NOTE: LARGER FONT] Then, we will ask you to compare two landscapes and indicate which landscape is *less* susceptible to wildfire. There will also be *four pairs* of these landscapes.
